

Backend/NodeJS Developer (m/f)

Become part of our young company as a backend developer with the opportunity to make a significant contribution to the development of our products, to grow and learn with us.

Who we are: We are a deep tech startup from Düsseldorf, Germany, that develops AI-based software solutions in the field of robotics and supports companies in automation technology.

Who we are looking for: A team-oriented developer who enjoys learning and is committed to communicating with customers. Demanding tasks are transferred directly to you. You will be involved in customer projects and will have the opportunity to contribute and implement your own ideas. If you work solution-oriented, independently and have fun with the topics AI and robotics, you are right with us.

Your profile

- Completed studies with focus on computer science, a comparable education or relevant professional experience
- Very good knowledge of JavaScript (ECMA Script 5 and 6), NodeJS and MongoDB
- Safe mastery of common development methods and tools (Git, TDD, Scrum, etc.)
- Basic knowledge of DevOps (e.g. Gitlab, Jenkins, Docker, Kubernetes) is a plus.
- You are customer-oriented a team player.
- You are pragmatic and want to implement your own ideas (also with the customer).
- You are highly motivated, willing to learn and want to take on responsibility.

Your tasks

- Implementation of an HTTP layer for existing microservices in the area of Computer Vision/Machine Learning
- Agile implementation of features from the product roadmap for our robot programming solution Rüstflex
- Creation of individual software according to customer requirements
- Implementation of component and integration tests
- Documentation

What we offer

- An exciting field of activity with personal responsibility and room to manoeuvre
- Steep learning curve in future growth areas (Computer Vision, Machine Learning, Robotics, Industry 4.0)
- Central role in growing deep tech startup with great development opportunities
- Open startup culture in a friendly team in a modern office in Düsseldorf
- Competitive salary with profit participation in the company's development
